

STARRY NIGHT

A wide-angle photograph of a dark night sky. The upper two-thirds of the image are filled with a dense field of stars of various brightness. A prominent, hazy band of light, characteristic of the Milky Way galaxy, stretches across the frame from the lower left towards the upper right. The bottom third of the image shows a dark silhouette of what appears to be a range of mountains or hills against the lighter sky. The overall atmosphere is serene and celestial.
